Kyle Kim

New York City

Journalist · Data visualist · Mapmaker · Coder

Data visualization specialist with 12+ years of experience in newsrooms. I analyze and translate complex data into visually compelling charts, maps and other graphics, working end to end from reporting and analysis to design and code.

EXPERIENCE

Bloomberg News Graphics reporter — Aug. 2022 – Present

- Design and deploy static and interactive data visualizations. I also often lead end-to-end data analysis and reporting for data visualization.
- Built static and interactive maps using a wide variety of geospatial data including raster and vector often for climate-related stories.
- Work in a highly collaborative environment, often partnering with reporters, editors and developers to turn complex information into clear visuals.

The Wall Street Journal Graphics reporter — Apr. 2020 – Aug. 2022

- Led reporting and analysis for enterprise visual investigations in business, sports and features.
- Partnered with cross-disciplinary teams to turn data into publication-ready graphics for Page One and national coverage.
- Helped graphics leadership coordinate visual coverage strategy across multiple desks.

Los Angeles Times Graphics and data journalist — May 2014 – Apr. 2020

- Analyzed data to produce visual investigations for enterprise and breaking news coverage.
- Assisted leading breaking news graphics coverage.
